SUMMARY

I am a Full-Stack Web Developer passionate about building web applications from the ground up to production. I enjoy learning new technologies and focus on creating end-to-end solutions, from frontend to backend. With a strong eagerness to learn and grow, I am committed to continuously improving my skills in designing, developing, and maintaining applications to keep them relevant and impactful.

SKILL

- **Programming Languages** : Javascript, Typescript, Python
- **Backend** : Node Js, Express Js, Websocket
- **Frontend** : React Js, Vite, Next Js, Shadcn UI, Tailwind, Bootstrap, HTML, CSS
- **Database** : PostgreSQL, Supabase, MySQL, Redis
- **Tools** : Git & Github, Postman, Figma, Google Collab, Trello, N8N
- **Cloud & Deployment** : Vercel, Railway, Ngrok

EXPERIENCE

PT GIT SOLUTION - Intern Full Stack Developer Moa Batch 9 September 2023 - December 2023

- Developed end-to-end web applications using EJS and Bootstrap for the frontend, and Express.js with Node.js for the backend.

Digiparts - Computer Technician Intern January 2019 - March 2019

- Performed routine maintenance and repair for computers and laptops
- Diagnosed and resolved hardware and software issues
- Installed and configured operating systems, drivers, and applications
- Conducted data backup, recovery, and system optimization
- Ensured devices operated efficiently and securely for end users

FORMAL EDUCATION

Amikom University Yogyakarta - Bachelor of Informatics September 2020 - August 2024

- Studying both software and hardware aspects of computing, including programming, networking, and embedded systems.
- Completed academic projects related to system development and integration, such as:
 - Traffic Light Simulation (IoT) – AVR + Proteus
 - Smart Door (IoT) – ESP32-CAM + Blynk, facial authentication
 - Face Mask Detection (AI) – YOLOv5 + PyTorch, accuracy >80%
 - SIBI Sign Language Detection (Thesis) – YOLOv5, dataset of 1,200 images
- Developing strong problem-solving, teamwork, and research skills through collaborative coursework and assignments.

SMKN 1 Banggai - Vocational High School, Software Engineering September 2017 - April 2020

- Specialized in web development and software, using javascript, html, css, visual basic
- Internship experience as a computer and laptop service technician
- Achieved 2nd place in the LKS competition, IT Software Solution for Business category

NON-FORMAL EDUCATION

PT DumbWays Indonesia Technology – Full Stack Developer

April 2025 - October 2025

- Learned to build full-stack applications from scratch using React.js, TypeScript, Prisma, PostgreSQL, and other modern technologies.
- Developed and deployed real-world projects with best practices in frontend and backend development.
- Gained hands-on experience with API development, authentication, database management, and deployment.

MY PORTOFOLIO

ShareNote

2025

- SharNote is a web application that makes it easy for us to share notes with others. With SharNote, shared notes can not only be read but also collaboratively edited by the people we grant access to, making collaboration easier and more efficient.
- Tech Stack : Typescript, React Js, Next Js, Tailwind, Prisma ORM, Supabase, Express Js, Node Js
- Github
 - Frontend : <https://github.com/AxVsel/sharenote-fe>
 - Backend : <https://github.com/AxVsel/sharenote-be>

Circle

2025

- A social media platform designed for those who want to express themselves freely, fluidly, and poetically. Anyone can socialize, interact, and engage in discussions effortlessly. Built with a minimalist and responsive design, Circle App offers an intuitive user experience. Users can create posts, comment, reply to comments, follow others, personalize their profiles, and easily discover new connections.
- Tech Stack : Typescript, React Js, Vite, Shadcn UI, Tailwind, Prisma ORM, PostgreSQL, Redis, Express Js, Node Js
- Github
 - Frontend : <https://github.com/AxVsel/circle-fe>
 - Backend : <https://github.com/AxVsel/circle-be>

FutsalGo - Team Project

2025

- FutsalGo is a web application designed to make it easy for users to book futsal courts quickly and conveniently, allowing futsal enthusiasts to plan their playing schedules anytime without hassle, while ensuring real-time court availability for a more efficient and comfortable reservation experience.
- Tech Stack : React Js, Vite, Typescript, Shadcn/ui, Tailwind, ExpressJs, Prisma ORM, PostgreSQL, Node Js,
- Github
 - Organizations : <https://github.com/FutsalGo>

Chatfilm

2025

- AI Chat about Movies is an interactive platform where users can discuss films, TV shows, and anime with the help of an intelligent assistant. From exploring movie recommendations, analyzing storylines, and discovering cast details, to diving deeper into genres and upcoming releases, this AI-powered chat provides a fun and engaging way for entertainment lovers to stay connected with the world of cinema. Whether you're a casual viewer or a passionate fan, the chat makes conversations about movies more exciting and informative.
- Tech Stack : React Js, Next Js, Typescript, Tailwind, Google Ai Studio
- Github
 - Website : <https://chatfilm-seven.vercel.app/>
